CCSS 2.MD.1 Measure the length of an object .....primer

# Measurement

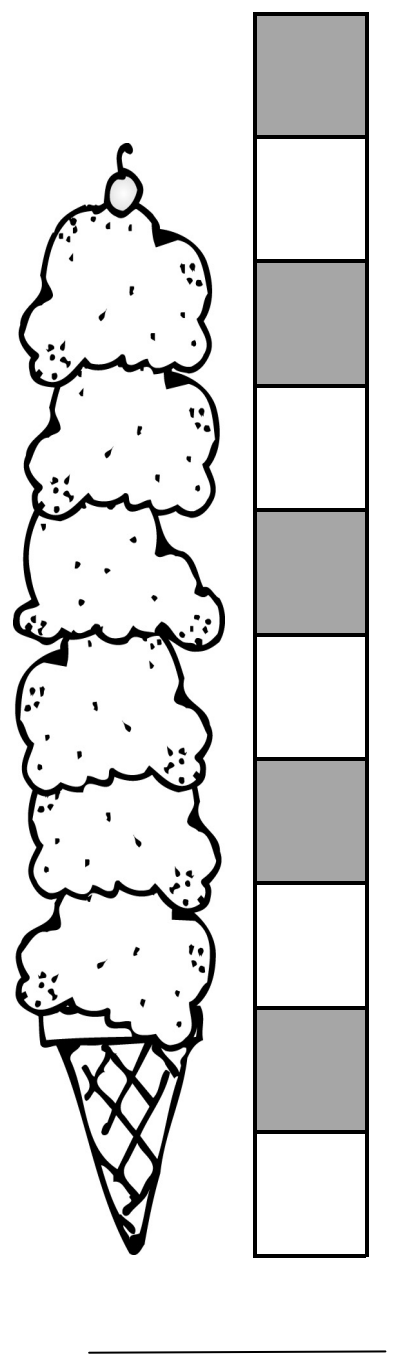

Directions: About how many blocks long is each ice cream cone?

A single scoop of ice cream on a cone is positioned to the left of a vertical measuring bar. The bar is divided into 10 equal rectangular blocks, alternating in color from top to bottom: grey, white, grey, white, grey, white, grey, white, grey, white. Below the bar is a horizontal line for writing the answer.

A double scoop of ice cream on a cone is positioned to the left of a vertical measuring bar. The bar is divided into 10 equal rectangular blocks, alternating in color from top to bottom: grey, white, grey, white, grey, white, grey, white, grey, white. Below the bar is a horizontal line for writing the answer.
