Name:_____

Adding Up to 4-Two Digit Numbers

👓 Directions: Find the sums using place value and commutative property strategies.

Example:

57 + 25 + 26 + 34 = ____
Break down into tens and ones.   50 + 7 + 20 + 5 + 20 + 6 + 30 + 4 = _____
Add tens together and ones together.   50 + 20 + 20 + 30 + (7 + 5 + 6 + 4) = _____
120 + (22) = ____
Break 22 into tens and ones.   120 + (20 + 2) = ____
Add the tens together and find the total sum.   140 + 2 = 142

Now you try.

36 + 22 + 44 +38

____ I double checked my work.
